The American Society of Nuclear Cardiology (ASNC) is pleased to invite you to exhibit at ASNC: Cardiac PET Intensive Workshop 2020 series.

The PET Workshops this year will provide a practical approach to cardiac PET. These 1.5-day case-based sessions will focus mainly on the how to perform, interpret, and report PET myocardial perfusion studies with and without myocardial blood flow. The workshop will also include a discussion of emerging applications of cardiac PET. Participants will read and review, with expert faculty, approximately 60 cardiac PET studies in small group sessions to enhance interaction and learning.

The workshop’s hands-on format creates an intimate learning environment of 75 participants, allowing your company more quality time to engage with attendees.

Reply today to secure your company’s sponsor tier at this year’s ASNC PET Workshop. You will have access to nuclear cardiology professionals specifically interested in learning about new solutions, ways to enhance patient care, and improve important PET-related workflow processes. Tabletop exhibit space is limited and available on a first-come, first-served basis.

“This workshop was designed specifically for physicians who are just starting or planning to start a PET lab.”

Marcelo Fernando Di Carli, MD, MASNC
The PET Workshop Program Director
